

CASA0029---Group 14 Project Info File

Yifan Zhang

Siyi Wu

Yanxi Ren

1. Project Output Table

Project Output	Output Description
Project Output Files	Zip File Submitted on Moodle
Project Website (optional)	https://220046.github.io/london_fire_story/
Project Methodology Summary (around 1000 words)	The project methodology is summarised on the Github repository page – link here: https://github.com/220046/london_fire_story

2. Individual Contributions Table

Task Name	Major Contributors	Additional Contributors	Use of AI Tools in this Task
Concept Development	All team members		No AI use
Data preparation and integration	Yifan Zhang	Siyi Wu, Yanxi Ren	Using Claude, Gemini, GPT to Improve Simplified Data Cleaning Code
Visualization 1: The Identity Shift: From Fire-Fighting to Multi-Function Emergency Service	Yifan Zhang	Yanxi Ren	This visualization was coded with AI assistance, specifically Claude
Visualization 2: The Spatial Mismatch: Demand Decentralises, Infrastructure Stays Put	Yanxi Ren	Yifan Zhang	This visualization was coded with AI assistance, specifically Claude; Using Gemini for Code Error Correction
Visualization 3: The Temporal Comparison: Seasonal Peaks the System Cannot Absorb	Siyi Wu	Yifan Zhang	This visualization was coded with AI assistance, specifically Claude; Using GPT to search for image websites

Website Development	All team members		Using Claude to Improve Web Page Layout
